

**AMADOR COMMUNITY ASSOCIATION  
DESIGN REVIEW GUIDELINES  
SATELLITE DISH FORM / APPLICATION**

Name (please print): \_\_\_\_\_

Property Address: \_\_\_\_\_

Home Phone: \_\_\_\_\_ Alt. Phone: \_\_\_\_\_

**Please include a picture or drawing of the proposed location of the satellite dish with this application. Applications submitted without a picture or drawing will not be accepted for review by the Association.**

The FCC permits the Association to regulate the placement of FCC permitted antennas, and the Associations regulations apply so long as they do not cause an unreasonable delay or cost in the installation of a FCC permitted satellite dish antenna or prevent the reception of an acceptable quality signal. Upon approval of this application, an FCC permitted satellite dish antenna may be installed upon a property with the exclusive use or control of the owner of the unit. Outside television antenna, aerial satellite dish or similar devices for the transmission or reception of television, radio, satellite, or other signals of any kind are prohibited.

The Amador Community Association hereby establishes the following guidelines for installation of FCC permitted satellite dish antennas upon property:

1. Authorized Antennas may be installed in the Exclusive Use Area on a mast tripod or railing. In the event that reception is not possible in any other location of the "exclusive use" area of a residence, the homeowner may request permission for the satellite dish to be installed on the building fascia in keeping with the specific guidelines established by the ARC Satellite Dish Committee. Installations are not permitted on common walls.
2. The satellite dish antenna must be of a color to blend in with the background. The cables or wire must be covered or painted to match the background.
3. No satellite dish antenna with a diameter greater than thirty-six (36) inches may be installed within the Association. (Under the FCC rule, the Association cannot prohibit, but can regulate, installation of a satellite dish antenna with a diameter of thirty-six (36) inches or less upon property within the exclusive use or control of the owner).
